

ClieTrek Features

- ✓ Graphical user interface.
- ✓ PA-POMS reporting.
- ✓ May be run via the internet making use of a virtual private network (VPN) and Citrix technology.
- ✓ All client information additions, changes, and deletions are tracked to meet HIPAA standards.
- ✓ Your administrator is able to update the lists of information used throughout the system.
- ✓ ClieTrek is licensed on a per-server basis, not by the number of users.
- ✓ Security may be set on each menu item; users only see the menu items to which they have access.
- ✓ ClieTrek has been developed and refined over the past 9 years with input from day-to-day users.
- ✓ Includes:
 1. A full-function demo system for initial and ongoing training.
 2. A searchable diagnostic code library for DSM III, DSM IV, and ICD-9.
 3. An interface with ScheduleTrek; a client, staff, and facilities scheduling program.
 4. A client liability calculation function.
 5. A client pre-intake form and process.
 6. 90+ reports available and your users can create more using Crystal Reports.
 7. A function for easily reassigning caseloads.
 8. The ability to track anyone associated with a client; guardians, siblings, team members, doctors, or anyone else.
 9. An on-line user's manual.
